

Covid Policy

The following COVID protocols were decided upon by Georgia Green Industry Association's Board of Directors in connection with Gas South District:

- Sanitation dispensers, wipes and reminders will be in select places across the show room floor
- High-touch surfaces, including restrooms and other common areas are disinfected regularly
- While we encourage social distancing to reduce the spread of the virus, we will not be requiring guest to wear mask at this time. There will be optional masks stations for attendees that would like a mask.
- Custodial staff is assigned as needed, based on the activity and size of the crowd.
- Gas South District has made significant improvements to air quality including our air handlers being equipped with MERV 13 air filters and UV lighting to help stop the spread.

We understand there are many differing opinions and feelings toward this current pandemic but our number one goal is to keep our members, exhibitors and attendees safe while still having some normalcy of an in-person show. Please be patient with us if these protocols are evaluated and changed over the months leading up to the show. We will inform our exhibitors and attendees of any changes that are made to this policy before the show.

Sincerely,

Stephanie Loudermilk,
Director of Member Services
Georgia Green Industry Association
